

Home Care Link

Home Care Link provides home care services to clients who require nursing care or supportive help in their own home, apartment, assisted living quarters or board and lodging setting.

Our staff nurse will privately assist you with treatments ordered by your doctor, setting up or monitoring your medications, giving injections, monitoring blood glucose levels, checking your blood pressure or providing skin care and dressing changes.

If assistance with your personal cares is what you need to remain in your independent living setting, our staff aides will give you help with bathing, dressing, grooming, shopping, meal preparation and light housekeeping.

Additional services such as a dietitian consultation, Social Service assistance, physical therapy, occupational therapy and speech therapy can be provided by Home Care Link through special arrangements.

Home Care Link services are available seven days a week. For information, please call the Director of Home Care Link at 507-664-8863.
